of Correction

This communication is a request for Certificate of Correction for the above subject Patent No. 7,028,063. There are errors made by the Office in the Inventor section (75) of the Issued Patents cover sheet (*see attached copy*) and specifically to the last name of the 5th co-inventor, i.e. Sam Heidari. This co-inventor's last name is one word, i.e. Heidari, not as it currently appears Heid Ari. This inventor's last name was correctly spelled in:

- a) the originally filed unexecuted declaration ; (*see attached copy*)
- b) in the subsequently filed executed declaration; and (*see attached copy*)
- c) in the Original Filing receipt. (*see attached copy*)

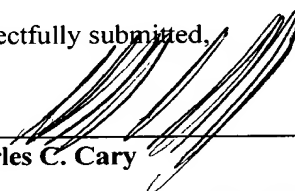

The error in its spelling in the Issued Patent Cover Sheet therefore appears to be an error introduced by the US Patent and Trademark Office, the correction of which is respectfully requested.

Should there be any fee due in connection with the filing of this request, the Commissioner is hereby authorized to charge such fees to Deposit Account 50-1338 (Order No. **VELCP003**).

Thank you for your assistance in this matter. Do not hesitate to contact the undersigned as indicated below should you have any questions regarding this matter.

Respectfully submitted,

(57) **ABSTRACT**

A Fourier transform processor utilizing discrete circuits each
of which is configurable for processing a wide range of
sample sizes. A single pipeline supports multiplexed bi-
directional transformations between for example the time
and frequency domains. In an embodiment of the invention
the Fourier Transform processor may be implemented as
part of a digital signal processor (DSP). In this embodiment
the DSP may implement both the discrete Fourier transform
(DFT) and inverse discrete Fourier transform (IDFT) across
a wide range of sample sizes and X-DSL protocols. Multiple
channels, each with varying ones of the X-DSL protocols
can be handled in the same session.
